Wildlife Repellent Recipe

Ingredients:

- o 1 whole Spanish onion
- o 1 jalapeno pepper
- o 1 tablespoon cayenne pepper

Directions:

- o Chop up the onion and the pepper.
- o Mix together and boil in 2 quarts of water for about 20 min.
- o Let cool, and strain the water through a cheesecloth.

NOTES:

1. Using a garden sprayer, spray any area outside where wild animals or even neighborhood pets are being a nuisance.
 2. This probably will not work for birds (birds do not have a sense of smell.)
 3. This process may have to be carried out for a period of 2 weeks to ensure success.
 4. This mixture is non-toxic and it will not harm any animal, but will succeed in keeping them away.

Skunk Spray Neutralizer

developed by Paul Krebaum

Ingredients:

- o One quart of 3% hydrogen peroxide
- o 1/4 cup of baking soda
- o one teaspoon of liquid soap

Directions:

- # Apply it to the sprayed areas.
 - # Wash off with tap water.
 - # The solution must be mixed as needed. It can't be contained in a bottle.
-

Skunk and Mammal Repellent

- o 8 oz of Castor Oil
- o 8 oz of any liquid dish soap
- o Mix well together then add to one gallon of water and spray your entire area.

Keeps lots of critters away!
